No.ISO/(6)-BPL/NSC-Corres/09-10

Date: 23.12.2009

Our NSC processing plant in M.P are located at Govindpura (Bhopal), Indore & Niwari. We would like to state that we are processing seeds in these plants where in small amount of dust/husk and Noise is being generated when the processing plant is in operation. The said plants operate in crop season i.e. Rabi & Kharif for maximum 8-10 Hrs.

We would like your laboratory to monitor the quality of Air and Noise pollution when the plant and DG set are in operation as per the norms of Environment Protection Act & State Pollution Control Board rules and regulations.

You are requested to send your quotation for monitoring the above parameters along with the schedule/frequency of testing including all the charges. A copy of valid license from ministry of Environment & Forests and list of instruments to be used in monitoring and their calibration status also be sent with quotation before 30.12.09.
